

REACH FOR A SAFER FUTURE

In the EU, the control and monitoring of the use and risk of the products we use in our daily life- from detergents and shampoo, to stationary items, clothes, toys and even electronic devices- is accomplished by the implementation of REACH and CLP regulations.

Both regulations, gather the new chemicals policy, and establish obligations for manufacturers, importers, downstream users and suppliers of substances as such, taking part into mixtures and contained in articles, in order to achieve a high level of protection for human health and the environment.

OUR SERVICES INCLUDE:

Taking into account the European legal framework, SGS offers you a competitive and individual solution to help you meet the requirements of both Regulations, among which we highlight:

GENERAL

- Seminars and customized training about REACH & CLP, and Biocides
- Assessment, impact analysis and design of action plan for companies
